

# SETTLEMENT SERVICES

It was identified that employees moving to the area struggle to find accommodations, especially in the short term while in transition. Through discussions with both locals and new residents, the majority of rental units in the area are not advertised through traditional methods.

This program is intended to provide local knowledge and connect potential rental opportunities to new employees from out of the area. For house purchases, employees would be directed to one of the local realtors via the business directory.

At this time, the program is targeted at year-round employees.
