

Flood Watch

Bracebridge-Minden-Parry Sound District

Gull River Watershed

Friday, May 02, 2025
1:00pm

The Ministry of Natural Resources (MNR) – Bracebridge-Minden-Parry Sound District is advising area residents that a **Flood Watch** bulletin is in effect for the **Gull River Watershed** in the District until Friday, May 09, 2025.

The Flood Watch will affect residents within the MNR Bracebridge-Minden-Parry Sound District for portions of the County of Haliburton.

Residents should expect water levels and river flows to remain high through the May 2-4 weekend and into the week of May 5-9.

Runoff into local lakes and rivers is anticipated to remain high with recent rainfall.

Lower-lying portions of known flood-prone areas will be impacted to varying degrees as lake and river water levels remain high in response to recent and forecast precipitation and melting snow in the coming week. Residents and visitors should exercise caution while around waterbodies and maintain close supervision of children and pets.

Residents that have been affected by high water and flow conditions in the past should continue take necessary action to protect/secure any vulnerable property in proximity to rivers and lakes and closely monitor developing conditions and regularly check for updated messages.

MNR advises extreme caution when using forest access roads for outdoor activities as many are seasonally inundated with water, prone to washouts and may be impassible due to current water levels.

The ministry is closely monitoring the weather and developing watershed conditions. Further updates will be issued as appropriate.

TECHNICAL INFORMATION

Description of Weather System

Temperatures over the next 7 days are expected to remain near seasonal with daytime highs up to +17°C and nighttime lows down to +3°C. There is up to 13 mm of rainfall forecasted.

Description of Current Conditions

Lake water levels have increased with recent rainfall. River flows have been variable over the past week. Flooding is possible if additional significant rainfall is received.

DEFINITIONS

- **WATERSHED CONDITIONS STATEMENT – WATER SAFETY:** indicates that high flows, melting ice or other factors could be dangerous for such users as boaters, anglers and swimmers but flooding is not expected.
- **WATERSHED CONDITIONS STATEMENT – FLOOD OUTLOOK:** gives early notice of the potential for flooding based on weather forecasts calling for heavy rain, snow melt, high winds or other conditions
- **FLOOD WATCH:** potential for flooding exists within specific watercourses and municipalities
- **FLOOD WARNING:** flooding is imminent or occurring within specific watercourses and municipalities.
